SAGA

SYSTÈME AUTOMATISÉ DE GESTION DES ABSENCES

Attendance is the key to success. Every missed class is a missed opportunity.

INTRODUCTION

SAGA (Système Automatisé de Gestion des Absences) is a digital solution aimed at simplifying the management of absences for students and professors.

ABOUT US

Wassim Mechergui

IDENTIFIED PROBLEM

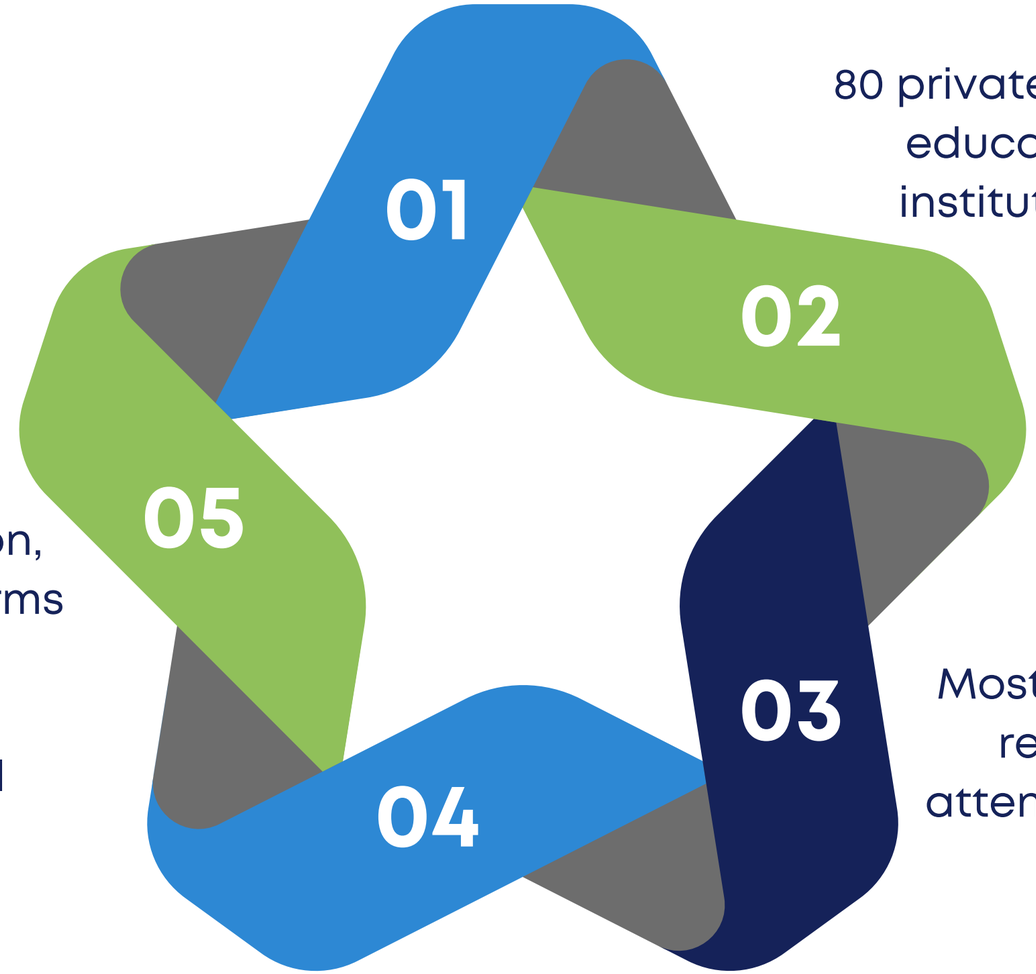
As students, we often feel less compelled to attend every class because the manual attendance system is ineffective. Professors find it difficult to manually track and calculate each student’s attendance ratio . As a result, many students take advantage of this without concern for consequences. Our project aims to address this issue by offering a simple and reliable solution for more accurate attendance tracking.

OBJECTIVES --> RESULTS

- **Automate** absence tracking for universities .
- **Allow** students to **report** and **track** their absences.
- Make attendance marking **easier** for professors.
- **Simplify** absence **validation** for administrators.

- **Clear** and **accessible** absence tracking.
- **Fewer unjustified** absences due to monitoring.
- **Time-saving** for professors and admins.
- An **efficient** and **easy-to-use** system.

MARKET ANALYSIS



206 state higher education institutions

80 private higher education institutions

Most universities still rely on manual attendance sheets or Excel

Ministry of Higher Education (potential partnership)

Absence of competition, as the existing plateforms are not designed specifically for the Tunisian educational system.

INNOVATION

The solution will be specifically designed to align with the Tunisian educational system.

FUNCTIONAL ARCHITECTURE

USER STORIES

AS A STUDENT

- I want to check my attendance records in real-time.
- I want to submit absence justifications through the platform.
- I want to receive notifications about my attendance status.

USER STORIES

AS A PROFESSOR

- I want to easily mark student attendance digitally.
- I want to view and manage student absences efficiently.
- I want to approve or reject absence justifications.

USER STORIES

AS AN ADMINISTRATOR

- I want to have a centralized dashboard for managing student attendance data.
- I want to validate and process student justifications efficiently.
- I want to generate attendance reports for university records.

TECHNOLOGICAL CHOICES

To develop the SAGA system, we have chosen the following technology stack:

- **Frontend** : React.js – for building a dynamic and responsive user interface.
- **Backend** : Express.js – for handling server-side logic and API requests efficiently.
- **Database** : MySQL – for structured and relational data storage.
- **Authentication** : Passport.js – for secure user authentication and session management.

USER INTERFACE & EXPERIENCE (IHM/UX)

SAGA places a strong emphasis on usability and accessibility to ensure a seamless experience for all users:

- **Intuitive Design** : A clean and minimalistic interface built with React.js to ensure easy navigation.
- **Responsive Layout** : Adaptability to different screen sizes (desktop, tablet, mobile) for a consistent experience.
- **Interactive Dashboards** : Professors and administrators have clear visual insights into attendance data.
- **User-Centric Workflow** : Simplified absence justification process with clear feedback mechanisms.
